BDR Enablement

This content is designed to be a "one stop shop" to better your prospecting skills. You can explore examples of elevator pitches, corporate presentations, and emails, and many other helpful tips.

NOAM Elevator Pitches

NetSuite E-Pitch Talk Track 1
"NetSuite is a software solution that allows businesses to unify all operations from sales and marketing to finance and project management. The cool thing about our software is that it is agile enough to cater to many companies in different industries such as Williams Sonoma and even that awesome camera company GoPro. We enable the people of those companies to focus on the core of what drives their business, rather than worrying about what maintains it. My part in the mix is that I engage prospective customers to evaluate if NetSuite would be a good fit for what they are trying to achieve."

NetSuite E-Pitch Talk Track 2
"Have you heard of GoPro? BuzzFeed or JawBone? These awesome companies are customers of NetSuite, which was founded on the mission that business management solutions should be a catalyst for business success.

We provide companies with business software in order to coordinate their efforts from back-office financials to sales and project management. This allows for them to focus on their business strategy and growth.

Our jobs as Business Development Reps is to give a potential customer their first impression of NetSuite in order to find out how we can elevate their company's success."

NetSuite E-Pitch Talk Track 3
"NetSuite is the number one cloud business software suite, offering a unified system that delivers powerful web-based tools including ERP, CRM and eCommerce solutions, to over 20,000 organizations globally. NetSuite is the only business management software that gives you real-time business intelligence for any facet of your organization. Our cloud solution terminates the need for on premise hardware and software, eliminating IT maintenance and upgrade costs and providing you with the most accurate 360-degree view of your company."

Corporate Presentations

Approved slides for NetSuite Partners to use in corporate presentations can be found on the Partner Resource Center under Products & Solutions > Product Marketing > General NetSuite Presentations. Use the Sales First Call Deck and any other presentations posted there. You are encouraged to select appropriate slides and tell a story - you do not need to use all slides provided or deliver them in the current order.

General Business:

Subject: Need Better Visibility?

Hi ${contact.firstName},

Are you looking to improve the way you manage your financial data to gain better visibility into what's happening across your organization?

Fast-growing companies such as, SRS Acquiom and Recovery Healthcare leverage NetSuite to unify diverse business processes such as accounting, sales, inventory management and reporting in one spot; making it much easier to scale while entering new markets.

I'd like to find a time to chat for 15 mins next week, there's no need for you to be evaluating systems right now, I'd be happy to be on your radar for when the time comes.

Is there a good day/time that work best for you?

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: NetSuite Basics for Your Business

Hi ${contact.firstName},

I wanted to follow up on my previous email below.

Since you may not be familiar with NetSuite, I wanted to share this quick video. It's 2-minutes long and gives a great overview explanation of NetSuite's core capabilities.

If you want to dig into further detail I am happy to field any questions or show you more. Are

you free this week for 15 minutes?

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: ${contact.firstName}, did you see my email?

${contact.firstName},

Following up on my note below in case it got lost in the shuffle – Do you have 10 minutes in the next two weeks to chat?

Please let me know your thoughts either way.

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: RE: ${contact.firstName}, did you see my email?

Hi ${contact.firstName},

I don't want to be overly persistent by any means, and want to ensure I follow up when it makes sense.

Many of the companies that I've worked with have had struggled to unify their financials with other business processes, gain visibility across the entire company, and make quick decisions based on real-time reports. Moreover, they have indicated that the above challenges have caused them to miss out on opportunities to grow their business faster.

Do you have availability early next week to discuss further?

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: Are you the right person?

Hi ${contact.firstName},

I've tried reaching out a few times to see if business management software is something on your radar. If it's not the right time, I completely understand, but please let me know so that I

can make a note on your record.

Lastly, if there is a better contact for me to speak with, could you please introduce me?

I want to ensure the message is reaching the correct person while being respectful of your time.

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: RE: Are you the right person?

${contact.firstName},

Following up on my note below in case it got lost in the shuffle - do you have 10 minutes in the coming weeks to connect for a call? If you are not the right person to chat with about this, I would really appreciate an introduction to the right person in your organization.

Thank you and hope to hear from you soon!

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: Quick 10min Chat? (Good)

Hi ${entity.firstName},

I saw that you were recently doing research into business management software and wanted to make myself available for any questions you may have. We work with many customers similar to yours.

NetSuite's cloud based suite of applications closes the gap between insight & action, provides real time visibility into your business and ties seamlessly into your operational systems.

Are you free at noon to have a quick conversation to see if NetSuite could be a good fit for your business?

Best,
${preferences.MESSAGE_SIGNATURE}

Inbound

Subject: Have you considered the cloud? (Good)

Hi ${entity.firstName},

I see that you were recently doing research on software solutions and wanted to make myself available to answer any questions you may have.

I am sure that ${company.companyname} is experiencing many of the same challenges as other educational organizations like supporting complex business models and tracking unique key performance indicators. We hear from our customers, like School of Rock, Formation Continue, and Nobel Learning Communities, that making a change to NetSuite's cloud based business management solution has helped them gain greater financial visibility and increased communication between departments.

When are you free this week to discuss?

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: Time for a quick call? (Good)

Hi ${entity.firstName},

I wanted to follow up from my call earlier and thought email might be a better option for you.

If you are looking to make an investment in a new business management software solution, I would love the opportunity to speak with you. We are working with many educational organizations to eliminate multiple data sources and provide a seamless way to manage financials, customers, and commerce.

For example, Make-Up Designory was able to decrease their monthly close times by 10 days. I welcome the chance to see if we could achieve similar results for ${company.companyname}. Do you have 15 minutes today or tomorrow to connect?

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: Let us help you streamline your processes

Hi ${entity.firstName},

If you are using a traditional on-premise ERP solution or multiple software systems, chances are you may be facing costly upgrades, and have a lack of insight into your client base and difficulty keeping up with changes in your organization.

NetSuite's cloud based platform allows companies to adapt to change, improve visibility and drive operational effectiveness by unifying fragmented data and streamlining business processes.

If this sparks your interest, I would love to have a conversation with you to see how NetSuite can help ${company.companyname} realize these benefits.

I look forward to hearing from you.

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: Professional persistence

Hi ${entity.firstName},

I apologize for my professional persistence; I have had trouble getting a hold of you.

We work with 40,000+ organizations and subsidiaries to help eliminate data fragmentation between multiple systems and gain real-time visibility into business performance. In the educational market, we focus on providing value to companies like yours by driving efficiency and providing a 360 view of the business.

Do you have 15 minutes this week to chat?

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: Let us make your life easier

Hi ${entity.firstName},

I hope all is well. I have a note that your company is evaluating business management software and I was pointed in your direction.

I wanted to follow up with you to learn about your current software landscape and help you determine if NetSuite's cloud-based business management platform could help ${company.companyname} achieve the same results we have for many others:

- Reduce audit preparation time by 50%
- Accelerate financial close by 20%-50%

- Reduce reporting time 30%-50%
- Increase business visibility and actionable customer insight 30%-60%

Let me know if it makes sense to evaluate how we can help & thanks again.

Best,
${preferences.MESSAGE_SIGNATURE}

Real Estate Example

Hi ${entity.firstName},

I tried calling you earlier, but you were unavailable...I hope you don't mind the direct approach but I read United Country's article in Inc. highlighting the company's growth and felt compelled to reach out.

I'm not sure if you're familiar with NetSuite - we help real estate firms gain more visibility into their financials, operations, and agent commission structures. Our goal is to drive operational effectiveness by unifying fragmented business management applications and offering more robust GL, AR, AP reporting capabilities to make better financial decisions.

A few years ago, Prudential Locations was looking for a better way to scale its high growth. Since implementing NetSuite, they've been able to close the books twice as quickly, while reducing administrative time and costs.

I love to learn more about your plans to continue scaling. Are you available {**insert date**} for a quick 5-10 min introductory call?

Best,
${preferences.MESSAGE_SIGNATURE}

Insurance Example

Hi ${entity.firstName},

I tried calling you earlier, but you weren't in yet...I hope you don't mind the direct approach, but I was reading IPMG's article in Inc. and felt compelled to reach out.

I'm not sure if you're familiar with NetSuite - we help insurance/services companies increase departmental transparency by unifying their accounting, client management, billing, and resource management systems in one cloud-based platform. That way, your team can drill-

down into financials more effectively, mitigate compliance Issues, and have better control over the entire client-to-cash process.

I was told that your team may be looking for more robust systems to help IMPG scale for growth more effectively in the future.

If it makes sense, do you have time on {**insert date**} for a quick 5-10 minute introductory call?

Best,
${preferences.MESSAGE_SIGNATURE}

Lending Example

Hi ${entity.firstName},

I tried calling you earlier, but you were unavailable…I hope you don't mind the direct approach but I came across a blog post from Funding Mate about a year ago highlighting the firm's growth and how you're supporting the growth of small businesses more effectively.

I'm writing to introduce NetSuite - we work with leading alternative lending platforms like Prosper, OnDeck, and AvantCredit to give them a more holistic view of their business and automate their financial processes within the cloud.

Avant Credit has integrated NetSuite's accounting platform with their LMS to completely eliminate manual processes and scale for growth (Video Below).

If it makes sense, are you available on {**insert date**} for a quick 10-15 min introductory call?

Avant Credit - NetSuite: https://www.youtube.com/watch?v=-9Q4dQhAiI4&feature=youtu.be

Best,
${preferences.MESSAGE_SIGNATURE}

Rental Equipment Example

Hi ${entity.firstName},

I tried calling you earlier, but you were in a meeting. I hope you don't mind the direct approach, but I was reading your blog post about the new equipment Avex has added recently, and felt compelled to reach out.

In light of such growth, I was wondering what plans you had to automate your team's workflows more effectively in 2016. I'm not sure if you're familiar with NetSuite - we work with rental services companies to help unify their accounting, invoicing, client-management, and inventory management systems together in one platform. For operations directors, our goal is to help them improve their lead-to-cash cycle, and gain more operational visibility into their rental activity and impact on profit/loss statements.

If it makes sense, would you be available on {**insert date**} or a quick 5-10 min introductory call?

Best,
${preferences.MESSAGE_SIGNATURE}

Outbound

Subject: Quick Chat

Hi ${entity.firstName},

I noticed your expertise in [insert role specific info from LinkedIn] and given your role and the research I've done on your company, I believe you'd find value in a brief conversation over the phone in the coming weeks.

I understand that ${company.companyname} was previously in contact with Oracle about potential software solutions this past year prior to Oracle's acquisition of NetSuite. As a little background, NetSuite is a cloud-based ERP solution that has enabled companies like Lyft, Fidelity Investments and LoveSac to consolidate business operations into one solution and automate processes such as billing, revenue recognition, renewals and more.

Given how we've helped other [insert title]s in your industry, I would love the opportunity to better understand your business goals and introduce NetSuite's broader solutions for your benefit and education. How would this {**insert date and time**} work for you?

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: Can We Connect?

Hi ${entity.firstName},

I wanted to follow up because I understand ${company.companyname} considered Oracle's software solutions in the past but did not move forward. A lot has changed and improved due to the acquisition of NetSuite, Oracle's go-to cloud-based ERP solution for fast-growing companies of your size. NetSuite provides a breadth of business software solutions for companies to help with operations such as billing, revenue recognition, renewals and more, our goal being to provide a rapid ROI and scalability as you continue to grow.

Can we find 10 minutes to connect and discuss what has changed both on our end and on yours? How does {**insert date and time**} look?

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: Correct Contact?

Hi ${entity.firstName},

We work with thousands of growing companies like you, specifically in {**insert industry**}, that we have seen invest in cloud-based technology to set up a scalable back office infrastructure. We help them automate back office processes such as billing, revenue recognition, renewals and more so that they can focus on their core mission, values, and growth goals. Last year, your organization began this journey by evaluating Oracle's ERP solutions.

Based on your position and expertise in {**insert contact's role**} I thought you would be the best person for me to speak with regarding Oracle's expanded portfolio of services with NetSuite, the go-to cloud-based solution for companies of your size.

Are you the correct point of contact? If yes, what is the best time to schedule a brief call to discuss, whether for now or down the road? If not, can you help guide me in the right direction?

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: Right time?

${entity.firstName},

Recognizing that this may not be a project for the immediate future, and that any sort of in-depth conversations rely so heavily on timing, I think that it would still be valuable to connect in the next few days.

I'd love to get a clearer picture of where ${company.companyname} is right now and what's on the horizon. We could also provide you with an overview of NetSuite and how companies leverage the platform to help them grow for your reference when the time comes to consider more robust solutions.

Would {**insert date and time**} work to connect for a conversation?

Best,
${preferences.MESSAGE_SIGNATURE}

General/Hiring Example

${entity.firstName},

I left you a voicemail earlier, but here's a quick note for context-- I wanted to reach out because I noticed {**relevant 3x3 info**}, {**relevant 3x3 info**}, and I'm curious about your plans to manage this growth from a systems perspective.

I don't know if you're familiar with NetSuite, so just in case - we are a unified cloud platform that enables you to automate processes and streamline workflows, giving you as the {**insert contact's role**} the real-time visibility you need, and your team the infrastructure to continue growing the ${company.companyname}.

I'd love the chance to learn about your internal processes and plans for growth moving forward. Do you happen to have some time to connect one day next week-- say Monday afternoon?

Thanks in advance!

Best,
${preferences.MESSAGE_SIGNATURE}

"WHEN THEY REPLY NO" Example

${entity.firstName},

I appreciate the follow up. Would you be open to a 5-10 minute introductory conversation with my account executive (blank) in the meantime? We'd simply like to take the time to learn a bit more about your business and inform you about NetSuite's initiatives within the cloud ERP software.

Are you available {**insert date and time**}?

Best,
${preferences.MESSAGE_SIGNATURE}

Wholesale Distribution:

Subject: Need help with Inventory?

Hi ${contact.firstName},

Are you looking to improve the way you manage your inventory or get data on your orders or customers in a timely way to help you make better decisions?

Fast-growing wholesale distributors like Lindemann Chimney, Lionel, and Big Agnes use the NetSuite platform to unify their orders, inventory, customer records, and financials in one spot; making it much easier to scale while adding stores or perhaps going wholesale.

I'd like to find a time to chat for 5-10 mins this week – there's no need for you to be evaluating systems right now—I'd be happy to be on your radar for when the time comes.

Is there a good day/time that work best for you?

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: NetSuite for Distributors

Hi ${entity.firstName},

I wanted to follow up on my previous email below.

NetSuite helps with item/inventory management, how orders are processed in the system, and how customer and financial data can be accessed in real-time. I am part of a team that specializes in Wholesale Distribution and we have a solution specific for your space.

If you want to dig into further detail I am happy to field any questions or show you more. Are you free this week for 15 minutes?

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: ${entity.firstName}, did you see my email?

${contact.firstName},

Following up on my note below in case it got lost in the shuffle – Do you have 10 minutes in the next two weeks to chat?

Please let me know your thoughts either way.

Thanks!

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: Re: ${entity.firstName}, did you see my email?

Hi ${entity.firstName},

I don't want to be overly persistent by any means and want to ensure I follow up when it makes sense.

Many of the companies that I've worked with have had challenges unifying their multi-channel commerce strategies, having visibility into inventory levels, and maintaining steady cash-flow as they continue to grow.

Do you have availability early next week to discuss further?

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: Right person?

Hi ${entity.firstName},

I've tried reaching out a few times to see if ERP is something on your radar. Perhaps you already have this covered, it's not the right time, or there's a better contact for me to speak with?

Please let me know either way- I want to ensure the message is reaching the correct person while being respectful of your time.

Best,
${preferences.MESSAGE_SIGNATURE}

Subject: Re: Right person?

Hi ${entity.firstName},

Following up on my note below in case it got lost in the shuffle - Do you have 10 minutes in the coming weeks to connect for a call or can you please direct me to the right person?

Please let me know your thoughts either way.

Thanks!

Best,
${preferences.MESSAGE_SIGNATURE}

SuiteSuccess Starter Edition:

Subject: Platform for Your Growth?

Hi ${entity.firstName},

I have been following {**insert company name**} for some time and would love to chat. I work with many growing wholesale distributors just like yours.

It's important to have a scalable, business management platform that grows with you.

Oracle+NetSuite has recently launched our "Suite Success Starter Edition," ERP, specific for growing wholesale distributors. Our robust ERP combines accounting & financial reporting with inventory management, a CRM, and more. No more manual, double entry.

Could we find a few minutes to catch-up? How does {**insert time and date**} sound?

Best,
${preferences.MESSAGE_SIGNATURE}

SuiteSuccess Starter Edition:

Subject: Bigger, Better Quickbooks?

Hi ${entity.firstName},

I understand that ${company.companyname} is currently running on QuickBooks. While QuickBooks is working now, it won't be the best solution for managing growth. Oracle+NetSuite has a robust ERP platform that will consolidate accounting & financial data, with an inventory management system, a CRM and more.

We've helped wholesale distributors and manufacturers like CMP Corp reduce costs by 25%, grow revenues by 26%, and immensely cut lead times as well as closing times.

Could we find a few minutes to get acquainted? How does {**insert time and date**} sound?

Best,
${preferences.MESSAGE_SIGNATURE}

Outbound

SuiteSuccess Starter Edition:

Subject: New NetSuite ERP for Distributors!

Hi ${entity.firstName},

I think ${company.companyname} would be an excellent fit for a new edition that NetSuite just launched. It is catered towards emerging wholesale distributors and gives you a solid foundation to grow your business on.

The offering includes:

- Up to 10 Users
- Inventory Management
- Accounting & Financials
- CRM
- Free Professional Services

Let's leverage this opportunity and set up a time to see if this new edition would be a good fit for your company. How does {**insert time and date**} sound?

Best,
${preferences.MESSAGE_SIGNATURE}

B2B E-Commerce:

Subject: QuickBooks is just a "quick fix"

Hi ${entity.firstName},

While QuickBooks might have been a quick fit for your company in the beginning- it's not going to be able to handle your key financials and data as you grow. NetSuite has seen this with countless customers and we have created an opportunity to combat these difficulties.

Let's set up a call so I we can discuss the differences between QuickBooks and NetSuite's **SuiteSuccess Starter Edition.**

Best,
${preferences.MESSAGE_SIGNATURE}

B2B E-Commerce:

Subject: Power To Choose

Hi ${entity.firstName},

I do hope that you can appreciate my direct professional persistence. I've been reaching out because I've hand-picked your company based on the fact that you're a distributor in {**STATE**} in the {**MICROVERTICAL**} sector. I work with many companies that remind me of ${company.companyname} for those reasons.

If I did not make myself clear before, please let me reiterate. You have the power to choose here: Are you interested in having 10 minute educational chat about NetSuite's collaboration with wholesalers? Is there a better time of the year for me to get back in touch?

Please let me know how I can be a resource (and not a burden) to you - I am happy to help but always strive to be respectful of your time.

Best,
${preferences.MESSAGE_SIGNATURE}

B2B E-Commerce:

Subject: NetSuite Follow Up

Hi ${entity.firstName},

Thank you for taking the time to speak with me today. I understand that you are in the early stages of your research and want to make as many resources available to you as possible to help with your due diligence.

NetSuite offers a range of solutions to support every aspect of your business; I have attached a data sheet detailing our inventory and financials capabilities {**MAKE SURE TO ATTACH INFO/FILES**}. You can also find several short product demos here if you're limited on time, or a longer distribution specific demo here.

Thanks again for your time today - if you have any questions, please don't hesitate to call or email me.

Best,
${preferences.MESSAGE_SIGNATURE}

Unresponsive:

Subject: Trouble reaching you

Hi ${entity.firstName},

I've had some trouble reaching you on the phone and thought email might be a better way to connect.

NetSuite has helped thousands of distributors improve their delivery efficiency, reduce inventory carrying costs and increase visibility into key performance indicators. Our platform automates manual processes to enable simplified financial reporting and shorter financial close times. I thought we might have the same results for ${company.companyname}.

When can we have a brief conversation over the phone?

Best,
${preferences.MESSAGE_SIGNATURE}

WD Outbound – Touch 1

Subject: Hi ${entity.firstName}! 10 minutes for {**Rep's First Name**}?

Good Morning ${entity.firstName}!

Hope you're doing well.

Wanted to reach out and see if we could find 5-10 minutes for an introductory chat. {**Rep's First Name**}, my NetSuite account executive, and I would love to get the opportunity to learn more about you and ${company.companyname}.

Could we find 5-10 minutes to say hello?

Best,
${preferences.MESSAGE_SIGNATURE}

WD Outbound – Touch 2

Subject: Good Morning ${entity.firstName}! 10 Minutes with {**Rep's First Name**}?

Good Morning ${entity.firstName},

Hope everything's going well.

I know that NetSuite had been in touch in the past with ${company.companyname} regarding some Cloud ERP solutions.

Wanted to see if we could find 10 minutes in your schedule for a quick updates chat - very casual. {**Rep's First Name**} and I look forward to chatting.

Best,
${preferences.MESSAGE_SIGNATURE}

WD Outbound – Touch 3

Subject: 10 minutes for {**Rep's First Name**}?

Hi ${entity.firstName},

Hope you're having a great week. Wanted to see if {**Rep's First Name**}, my NetSuite account executive, and I could earn 10 minutes on your calendar.

Would love to introduce ourselves and learn some more about ${company.companyname}.

We also host a bunch of events in {**Insert State Name**}. Just last week we hosted a {**Insert Relevant Event**}. I'd love to invite you to a few.

Could we find 10 minutes to connect on Friday ${entity.firstName}?

Look forward to hearing back.

Best,
${preferences.MESSAGE_SIGNATURE}

WD Outbound – Touch 4

Subject: Should I Stay or Should I Go?

Hi ${entity.firstName},

I've been trying to reach you and totally understand that you're a very busy person. ${company.companyname} falls into our {**MICROVERTICAL**} sector which is a great fit for our business management solutions.

Would you be open to a free product demo process from us to see what the competition is using?
If you aren't evaluating ERP systems, please let me know and I can take you off of this list.

Looking forward to a response.

Thanks, ${entity.firstName}!

Best,
${preferences.MESSAGE_SIGNATURE}

WD Outbound – Touch 5

Subject: NetSuite Free ERP Demo?

Good morning ${entity.firstName},

Hope you had a nice weekend. Wanted to touch base and see if anything on was the agenda for ${company.companyname} in terms of business management systems.

If so, I'd love to help get a free demo process started of NetSuite's ERP, customized for ${company.companyname}. Our ERP integrates accounting & financials with inventory management, warehouse management, logistics, and everything in between to help efficiently run your back-end systems.

Look forward to hearing back.

Best,
${preferences.MESSAGE_SIGNATURE}

Disqualifying Leads Messaging

Solution Requirements

- "Based on what you have shared about your business needs, I don't think that NetSuite would be the best solution for you at this time."

Company Size/Budget

- "Thanks for helping me get a better understanding of your business. I usually find that companies similar to yours feel that NetSuite is too much for their needs. I can send you an email with my contact details and I hope you will consider us in the future as your company continues to grow."
- "Thanks for helping me get a better understanding of your business. I usually find that companies similar to yours feel that NetSuite is too much for their needs. When you take a look at the market, I think you will find there are solutions that more closely align with your goals. I can send you an email with my contact details and I hope you will consider us in the future as your company continues to grow."

Point Solution

- "Thanks for sharing some information about your project goals. It sounds like you are looking for a point solution to solve XXX challenge in your business. Our customers find value to bringing together disparate systems to create a more seamless workflow. Is that something you would be open to considering?"

Objection Handling

Common Objections

When speaking to leads, it is important to establish trust. Below are some frequent objections you will probably hear when prospecting, along with some answers you can use to bring value to leads you are prospecting.

Objections About...

Budget/Cost	
"We have no budget for that"	"I definitely understand what you are saying. Just to clarify, when you say you have no budget, is that because you have already spent it, or because there is just no budget available for a new system?" "I understand. However, if budget wasn't an issue, how high is this on your priority list?" "I see what you are saying. Where is the majority of your budget being allocated as of now?" "I see what you are saying. What would allow you to generate the budget for a new software?" "What investments are you currently making to continue to grow your business?" "I completely understand. What would you say your max budget would be? What would you require in a new software to consider spending beyond that?" "We've worked with many businesses similar to yours and have been able to help them lower the cost of TSA by 30-50%. "If you want to grow your business you have to invest in it to make sure you're meeting all of your current projections."
"We've already spent our budget on a new system"	"I can understand that. If you don't mind me asking, what have you spent it on? How is that working for you?" "I see what you are saying. Have you spent it on one business area? OR What business area did you spend it on?" "I understand. How much flexibility do you have if you find a unified solution to manage all of your core business functions?" "That is a great to hear. If I might ask, how do you currently manage your people, from an HR perspective?" "I understand. Is this new system subscription based or on premise? If subscription based, would it make sense to reach back out this time next year when you might be re-evaluating?"

"It costs too much"	"No problem. Just out of curiosity, when you say it costs too much, what do you mean?" "What would you be willing to spend, if any on a new system?" "What are you comparing the cost to?" "What are you specifically looking for in a new software? All the functionality you're looking for?" "What would be your backup software if you aren't looking to invest in NetSuite?" "What are your options if you don't choose a new software? What's your backup plan?" "I understand. However, have you figured out the potential cost of not taking action?" "I see what you are saying. Just out of curiosity, how high on your priority list is it to get a system in place?" "I know this is a little blunt but what do you say when a customer tells you that your services cost too much? "What would the software need to have for you to not feel like you are paying too much?" "What's the main functionality that would make this investment worth it?" "In your opinion, what department could be more efficient? And inevitably, why do you think that is?" "Consider what it would cost you if you don't reach your business goals" "We offer a variety of payment options to make this more cost effective for you" "There might be cheaper options but our prices are based on the value of our products"
"Invested in something (for the next 3...5...years) and financially, can't switch"	A: That's interesting to hear because we work with a lot of companies running on X that need to inexpensively and quickly deploy acquisitions and branches. Williams-Sonoma deployed NetSuite in APAC because we implemented in half the time at a fraction of the cost. Would you be interested in having a conversation with us about rolling NS into your legacy software for new branches? Great tactic for larger companies. A: I completely understand your investment. Even though you can't switch for a few years, many of the executives I speak with found that learning about other solutions on the market was helpful. Opens the door for a conversation.

Time	
"Call me back in 6 months."	"It sounds like you have got a lot on your plate. Is there a particular reason why 6 months from now works better for you?" "I respect that. What will be different in 6 months that would make you want to speak with me then?" "I can call you back in 6 months. However, what needs to change within your business to start looking at new business management software?" "If 6 months is the best time to reconnect, what's at the top of your priority list right now that is taking precedence?" "Why is this on the back burner for now?" "That's perfectly fine. However, often times we've found it beneficial to have a conversation not, that way should questions arise internally over the next 6 months you will be better informed." "In 6 months' time, what will the decision-making process look like?"
"That's not my priority right now." "We are focusing on other projects currently."	"Not a problem. If you don't mind me asking, what are some of your priorities at the moment?" "I understand. Just out of curiosity, what are some challenges you are facing that are a priority to fix right now?" "No problem. What is on the top of your priority list?" "Not a problem is this is not something in the forefront according to your business needs right now. What aspects of your business are you focusing on right now?" "When will this become a top priority for you guys? Timeframe?" "Is there anything I can provide you with in the meantime?" "In order for me to pass along the best research, I'd like to get a better idea as to what you are looking for." "I totally understand it it's not a priority right now. I've spoken with other (job title)s even at this stage of the game and we've been able to have a productive conversation about their businesses and NetSuite so when other questions arise internally you are more informed. Are you open to just a brief conversation?"

"Not right now"	"I totally understand this isn't a priority right now, but you might benefit from having a conversation to get a high-level overview on some of the products and services, so you have that information moving forward." "I have to admit, I hear that from many professionals in the ___ space. What they've found is that it's helpful to learn a little more about their options so when the time comes, they can make a more informed decision." "When you say right now. What does that timeframe look like? Are we talking weeks? Months? Quarters? Years?" "Are you currently exploring any other business management systems?" "That's fine. Do you have any growth plans for the future?" "If not now, when should I follow up?" "I'll check back in at the end of the quarter to see what your current situation is to see if anything has changed?" "I am sure you are very busy right now. I will reach back out in a week when you might have a few minutes to chat." "Are you not evaluating right now or are there other things higher up on your priority list at this time?" "I understand you're busy. What takes up most of your days to prevent you from focusing on growth areas for your company?"
"I haven't had the chance to look at any of the info yet"	"Was there someone internally that asked you to look into this?" "Was there someone internally that requested you to research this topic?" "Ok, who would be the best person I should speak to?" "Do your day to day activities require you to use the existing software your company has in place?" "I understand you may not be involved in the decision-making process, but in your opinion, if there is a need to re-evaluate your existing software, perhaps we can work together to get this in front of the right individuals internally. How can I help with that?" "Not a problem, could you connect me with someone in your IT department/Finance department?" "That is not a problem, I am sure you are very busy. A lot of people I speak to find it helpful to schedule a quick call to talk through the information and I can answer any questions as we go through the info – what does your availability look like this week?" "I completely understand. Why don't you tell me 2-3 of your specific questions, that way I can summarize the info in an email to streamline answers to your questions, sound good?" "Not a problem, if I may ask what prompted your initial research into this information?" "Ok that is fine – why don't we schedule a call this Wednesday after you have had the opportunity to look through the information?"

Point of Contact	
“I’m not the right person to speak with. I wouldn’t be involved in the decision-making process.”	"Not a problem at all. I’d still love to pick your brain a little about your company, and your role? How long have you been working for __X Company__?" "Why were you doing research?" "Completely understand. I speak with people on a daily basis who aren’t necessarily the decision maker for implementing a new system, but they usually have an opinion on the system they are currently using. How’s your experience been?" "I’m glad I got you on the phone anyways because generally when someone was doing research, no matter the role (midlevel employees) I like getting in contact with the head of the department because they have the biggest overview of the pain points and would understand why there is interest in the first place. What do you struggle with on a day-to-day basis with the current system?" "Do you know why your employees might be looking into this information?"
"I'm not the right person"	"Would you be willing to connect me with the appropriate person to discuss ____?" "Could you point me in the right direction?" "I’m happy to update my records, but do you know who a better point of contact might be who knows about financial reporting?" "Would the other person be the right person?
"And no, there's no one else here you can contact."	A: Why is that? (“… No names policy…”) – My goal is not waste anyone’s time by speaking to the most relevant contact. A: Thank you. (Find another contact on LinkedIn etc. Call new contact and disregard person who told you there are no other contacts. Also, gather info from previous person and position it in your email with the new contact. “I understand you’re running on Great Plains and are having x and y issue with it.”)

[Gatekeeper] "Is he or she is expecting your call?"	A: Yes, we've had previous email correspondence. A: I'm trying to get a hold of them, actually. Are you in charge of managing their schedule? I'm just looking for 15 minutes next week to discuss our cloud business management solution and the other similar companies we work with.
If you get a NO from the CFO or owner of a small/medium/large company, should you still reach out to other contacts?	YES, doesn't matter the size of the company! Deals are always more complicated than just one decision maker holding all the cards. You must reach out to at least 2 more contacts and follow the touch plan with them before marketing it as DQ.
If the prospect says they went with another solution, should you still contact other people?	YES! You need to follow the touch plan and reach out to at least 2 more people before DQing them. When did they go with another solution? Has it been implemented? Where in the sales cycle are they? They could be in the middle of a cycle.
If it is a ONE-person company or a single consultant who has their own business that is just them what do you do?	If there you are 100% that it is a one person business or just a personal consultant (LLC) then it is understandable to reach out to only that contact.
If you are struggling to find other contacts and people, how much time should you spend looking for those contacts?	LeadSource, Value Navigator, LinkedIn, GOOGLE If you've gone through all those resources and still can't find anything, email the info@ email address or another general address asking for the right point of contact.

Competitor / Using other Solutions	
"We already picked an ERP solution." “We’re happy with what we have and don’t expect to change.”	"Oh nice. What system did you end up choosing?" "What was the deciding factor that made you go ahead with them?" "What do you like about it so far?" "For my own knowledge, is there anything that they won’t be able to do that you were looking for?" "What time of year would you typically re-evaluate new software?" "With the system that you went ahead with, what the implementation process look like?" "What are you growth plans over the next 5 years?" "What do the upgrade options looking like with the software you chose?" "Do you know if and when your current system needs to be upgraded? How will that process work?" "What other software options were you considering before making this choice? Why did they not make the cut?" "Do you know what version you are currently running?" [Are you aware that Oracle has no plans to update the existing PeopleSoft version?] (GEA)
“We just upgraded our system and have no intentions to change solutions.”	"Great happy to hear that. What system are you running now? What system did you move off of?" "Who was responsible for the implementation? How was the implementation process?" "What was included in the upgrade? Any major changes to the system?" "Are all of your subs and other divisions going through the same upgrade? All at once? Do you have any divisions or offices overseas who are still using an outdated system?" "Do you know what version you are currently running?" [Are you aware that Oracle has no plans to update the existing PeopleSoft version?] (GEA)

"Use in-house system and quite pleased with it"	A: An in-house system uses up internal resources and man hours. Using a provider will free up time and will be more cost effective in the long term. A: That's interesting. How long have you had your own in-house system for? Are you looking at developing more functionality for it in future? Have you considered the cost of integration with other systems as well as maintenance costs? A: Glad to hear it's working well - what is your favorite part? In a perfect world, what else would your system be able to do? How many other systems do you have to run other aspects of the business? (There are a lot of possibilities with this one.)
"Already using competitor and love it"	A: We have a lot of companies who have switched off of X system and here is why. Many of them thought that taking just 10 minutes was helpful to learn what else was available on the market. Great statement - client voice, commitment to only take a small amount of time - hard to say no to.
"Outsourcing of IT / All done by 3rd party"	A: That's interesting. Could you tell me a little more around how that works within your business? Effective. This can mean a lot of different things…outsourcing hardware, contractor support, etc…need to figure out what exactly they are doing and what software systems are already in place. A: Is the main reason for outsourcing everything due to the lack of resources in-house? NetSuite is a great solution to optimize solutions while not increasing headcount because of its user friendliness and the fact that we've got shared implementation so we teach you personally how to use it during implementation. The "Why" questions are great.

No Interest in the Cloud	
"Problems of cloud - poor Internet connectivity, lack of Internet in areas (Ireland, Scotland, Eastern Europe)"	A: That is a very valid point, but similar problems have been overcome by businesses in your area. The return of investment in one of our systems could involve enough cost savings to warrant a better internet provider. A: NetSuite has customers throughout the globe in a number of remote countries including China, Russia and Nigeria. We are able to run on a low bandwidth and traditionally have less traffic than most web-based sites/pages.
"We don't trust/have no interest in the cloud"	A: What about the cloud do you not like? Do you have employees all in one location or are they spread out geographically? What happens right now when your on-premise software goes down? With NetSuite we have a full-time team dedicated to preserving the best uptime in the business. We have invested hundreds of millions of dollars in our security and would love to speak with you more about this. What I think you will find is that NetSuite's cloud software might make you feel more comfortable about moving to the cloud. A: Do you bank online? Do you trust your bank? We have the same security encryption as your banks do—which is proven to be more secure than on-premise servers in terms of data protection. Thorough yet direct. Addresses the multiple concerns and digs for info.
"Too robust a system." "We're not big enough for NetSuite"	"What do you mean by too robust?" "What functionality are you looking for?" "What are the top three functions that you are looking for in a system?" "We work with 5 person startups, all the way up to enterprise business – it's not a one size fits all solution. It's fully customizable to fit your business needs. It'd be helpful to get a better idea of what you are looking for in a system? "We're glad you think that. What are the key needs you are looking for in a new software?" "We often hear that. What our customers have found is our system allows them to manage all areas of their business more efficiently now and in the coming years. What are your growth plans over the next 3 years?" "While it may appear to be too robust a system now, NetSuite can be customizable to your specific needs. Talk me through exactly what you are looking to achieve out of a new software solution."

Can you send me more information?	
"Send me additional info over email and it if it's of interest, I'll be in touch. No need for a follow-up call."	A: I'd be happy to send you some additional information, but our solution is so comprehensive I'd really like to take 10 minutes to ask some questions and learn about your needs. I think I'd be able to have a better understanding and know what sort of information about our system might be of interest to you. A: Because NetSuite offers such robust functionality, can you give be a better idea of what would be of interest to you? Ok, and would you rather read a whitepaper or watch a demo? (If they answer affirmatively, I would also keep them on a drip campaign so you are top of mind when a need does arise.) [ALWAYS PLACE A FOLLOW-UP CALL, EVEN WHEN THEY TELL YOU NOT TO]
"Send me more information."	"I speak with executives often who tell me that inevitably they'll either end up having a few questions after reading through the information or they don't end up finding time to look over it. Would it be possible to put 10 minutes on the calendar so I can answer your questions this coming week?" "I'd be happy to send more information. What caught your interest that you would like more information on?" "I can definitely send you some information, but we offer a wide variety of solutions in a diverse range of industries so understanding your business needs would help me get a better idea as to what you're really looking for." "What questions will this information help you answer internally?" "I'm not even sure NetSuite would be a good fit for your business so I'd like to ask you a couple of questions first to see if this is something you could benefit from. Tell me a little about __X Company?" OR "What are some of your responsibilities on a day-to-day basis?" OR "What sparked your interest in looking at NetSuite?" OR "What's your role within your company?" "I can definitely send you information, but I have a ton of material. What type of information would you be looking to review?" "No problem, I can send you an email with some information. But first, I just need to know, what information would be most helpful for you to see?" "I don't want to spam your inbox. What kinds of resources would be most helpful for me to send along?"

Qualification Questions

Qualifying is an art. It's easy to follow a long list of questions, but think about how that sounds to the prospect? It feels like you are working your way through a checklist and are not knowledgeable on their business/industry. Your goal should be to secure as much information as you need in order to promote the lead with the fewest questions possible. This means asking open-ended questions and actively listening. Most contacts will be happy to talk about their business and challenges if you give them the opportunity.

These questions are designed to be conversation starters - you do NOT need to ask them all. Focus on getting key customer/contact details and ANUM in order to promote the lead.

Lead Information

- Company name:
- Lead source:
- (Company website)
- (Date of first conversation)
- Primary Contact:
- Other contact + role:
- Number of employees + revenue:
- Company description:
- Headquarters:
    - Other locations?
- Proposed # of users:

Drivers

- Reason for contact:
- Exploring new solutions?
    - Is it event-driven?
- How were you referred to NetSuite? (Previous use?)

Current Environment

- ERP, CRM, webstore, payroll and/or PSA in place:
- Challenges with current systems:
    - Preventing growth?
- How long systems have been in place:
- Are your systems integrated?
- Cloud systems in place:

Evaluation Process

- Tell me what the process looks like on your end:
- Decision-makers:
- PE/VC-backing?
    - If so, who makes the final decision, you or the PE firm?
    - If so, who is the PE firm?
- Evaluating other solutions?
- Budget:
    - Do you have any price expectations? Ballpark/ceiling?
- Timeline:
    - Is a current contract going to expire?
    - Purchasing timeline:
    - Implementation timeline:
- WHY?

Disqualifying Criteria

- Price/Budget:
- Small business CRM need:
- Comfort with cloud:
- Point solution need:
- Elaborate compliance requirements:
- Just researching:

Mandatory Qualifying Questions for Government Leads

1. Do you need a solution that is FedRAMP compliant?
    - Definition: The Federal Risk and Authorization Management Program (FedRAMP) is the government's method of standardizing the process for assessing and authorizing the security of cloud solutions. Therefore, all Cloud Service Providers need to meet the specific FedRAMP requirements in order to work with organizations in the government space.
    - If they say yes… Be upfront by telling them that NetSuite has not yet gone through the process to gain FedRAMP authorization. Because of this, we aren't the best fit for the public sector, but if anything changes in the future we can absolutely revisit.
    - If they say they don't know *(a common response for non-IT people)*… Explain the definition of FedRAMP and why we are not compliant at this time. If they are still unsure, ask them if they can follow up with the right resources at their organization who would know if they need FedRAMP or not.
    - If they say FedRAMP compliance is NOT necessary…move on to next question:
2. Do you buy on a GSA Schedule?
    - Definition: GSA Schedules/Contracts (also referred to as Multiple Award Schedules (MAS) and Federal Supply Schedules (FSS)) contain pre-negotiated pricing, terms, and conditions which streamline the government sales process. AKA, they buy at certain time period, from approved vendors, who sell a certain group of products at set prices. Primarily used with federal agencies/departments but can also be used to sell to state and local gov.
    - If they say yes… We do not have or sell based on a GSA Schedule contract and do not intend on making that investment in the near future. Explain that we wish we could work with their organization, but ultimately we cannot adhere to a GSA contract.
    - If they say GSA Schedule is NOT necessary… Get the rest of the regular PQ information & promote.

Software

(Include information like VC Investment Portfolio, Angel Investors, and Series of Funding)

- Year Founded:
- Investment Backers (if applicable):
- Private, public, preparing to IPO:
- Rev rec/recurring billing need?

eCommerce/Retail

- Do you have a website or future plans to have one?
- Do you sell online or in-store? What %?
- What platform is your website on? Who developed it?
- How many websites do you have? Do all sites filter data to one system?
- How does your site transfer info to your CRM/financials?
- B2B/B2C? # of SKUs? Transactions per month?
- How are orders tied to inventory?
- Walk me through your order-to-fulfillment process:
- Do you sell/plan to sell on eBay and Amazon?
- What are you using for point of sale? Is it integrated?
- Do you manufacture your own products or purchase from vendors?
    - Describe purchasing process
- Do you require shipping integration?
- Which payment processing gateways do you use?

Wholesale Distribution

- How many warehouses do you have? How many items?
- How do you physically manage inventory within the warehouse/across warehouses?
- How accurately do you forecast item demand?
- How do you know when it's time to order more inventory?
- How often do you have over/understocked items?
- Do you track landed costs?
    - -Cost for item to get to distribution center (taxes, tariffs, shipping, etc…)
- Walk me through the inventory process, beginning with receipt of items:

Services

- How many resources/projects do you manage?
- What does your typical project plan look like? Is it repetitive?
- How do you assign the right resources to projects?
- Do they spend time "on the bench" between projects?
- Are any of your processes done manually? (time, expense, billing)
- How do you know if a project is on-time/on-budget?
- How do you bill clients? What type(s) do you use (milestone, T&M, fixed bid)
- How do you track time against projects?
- How do you forecast revenue/staffing/billing?
- Can you report on planned v. actual? (budgets, demand planning, utilization, project timelines)

Manufacturing

- What are you manufacturing?
    - Are you manufacturing to build a stock or is your product custom built?
- Where do your raw materials come from?
    - Do you do final assembly or complete manufacturing process?
- Do you require shop floor control functionality? *(i.e. routing to different work stations and viewing percentage complete - it's a system of computers and/or tools used to schedule, dispatch, and track the progress of work orders through manufacturing based on defined routings.)*
- Are you currently using a bill of materials (BOM)?
- How do you know when to manufacture more?
- How do you currently forecast production?
- What is your revenue breakdown? Do you earn more than half of your revenue from goods you manufacture?

Nonprofit

- How are you funded? Do you track donations?
- Are you a 503(c)3 organization?
- Are you using any industry specific software?
- Does your organization bring in more than $5M in revenue? (If not, then they may be eligible for a grant)
- What is your plan for implementing new software? Is there someone in your organization or a volunteer that will help with the new software?
- How do you reinvest profits into your organization?
- How do you generate public interest?
- How do you stay in line with tax regulations?
- How to do you track volunteer outreach?

General Business

NOTE: Always ask about their current use/evaluation of industry-specific software solutions.

GB - Healthcare

- How do you manage inventory?
- Do you use any industry-specific solutions?
- Do you need to be HIPAA compliance?
- How do you bill your clients?
- What other solutions are you considering?
    - -Other integrated business management solutions or just industry-specific solutions?

GB- Real Estate

- How many properties do you manage?
- How many salespeople do you have?
- How do you track/pay commissions?
- Do you use any industry-specific solutions?
- Tell me about your current web presence

GB- Construction

- How many of your employees are full-time v. part-time v. independent contractors?
- How many projects do you manage?
- How do you currently manage/track projects?
- How do you bill your clients?

GB- Insurance, Finance & Accounting

- How do you stay compliant with government regulations?
- Do you use any industry-specific solutions?
- How many clients do you manage?
- How do you bill clients?
- How/how often do you currently report? Do you have specific reporting requirements?

Prospecting 2.0

3 x 3 Research

- Spend no more than 3 minutes finding no more than 3 pieces of research
- Focusing on common trigger events for NetSuite
    - Planning to IPO
    - VC funding
    - Growth / Rapid hiring
    - Divestiture
    - International expansion / Subsidiary
    - Acquisition
    - Ex NS/OA user joins new company
    - New CFO
    - Obsolete accounting
    - New product line or service
    - New buying group or association
- On inbound, lead source will count as 1 piece of research
    - For example, when a lead downloads a whitepaper on outgrowing QuickBooks, you should use that information as part of your research

Talk Track
FOR INBOUND LEAD FOLLOW UP:

The key in preparation is to come up with a Hypothesis of Need that matches with each lead source (aligns with the topic of a webinar, speaks to a trend in a whitepaper, etc) and to sub in the corresponding Shared Truth, according to where the lead is coming from. 3x3 is great to insert after “Permission to Continue” when you have it, but not as critical to include as the Hypothesis of Need.
Questions to consider:

1. Why are the beginning and the end the most important parts of the call to plan?
2. Why is it important to state the Shared Truth BEFORE referencing the lead activity?
3. What is the significance of placing the description of NetSuite later on in the talking points?

"Hi Bill, this is Jenna from NetSuite"

...

"How's it going this afternoon?"

...

"Good, hey - am I catching you on your way to a meeting or do you have two minutes?"

...

"Great - I'll be fast here. The reason for my call is that I've been talking to a lot of other CFOs who are finding that when they can't create reports at will, it's really affecting their ability to make business decisions in a timely manner." [PAUSE]

"I noticed you downloaded our whitepaper on___ and I thought you might be seeing a similar trend. How has your thinking about reporting evolved in recent years??

...

"You know, that's exactly what I've been hearing from a lot of my clients. One thing I'm always curious to hear is: [Qualifying Question]."

...

...[Prospect asks about NetSuite]

"Sure, so we are founded on the principle that___. Our clients work with us because they're trying to (fix/accomplish/avoid) ____. We help by providing___.

...

"Well it seems like we can definitely find some relevance in what our clients are doing. Now I said I'd make this quick, and the purpose for my call is to find time for us to talk when I'm not catching you off guard. How does Thursday look to pick up the conversation?"

...

"I'll send a calendar invite to confirm. Just so we make the best use of your time, do you mind if I ask you two more quick questions?"

...

"Is there anyone else you'd like to include in the meeting?"

...

"What have you found to be the biggest priority as you are heading into the second half of the year?"

...

"Bill, have a great day. Looking forward to speaking again soon."

Hypothesis of Need (HoN)

- Combine knowledge of the industry with your 3x3 research to think of reasons why the lead would want to switch business systems
- This is not the message you would leave for the contact, but a best guess on the issue or issues they are struggling with
- Using the QuickBooks example above, below are example HONs:
    - Trouble tracking financials from multiple entities, need for system that can roll all entities to a single GL automatically
    - Manual reporting and reconciliation at month end, need for faster system to reduce book closing time
    - Manual, double entry of sales orders from CRM, need for unified system that captures sales information automatically

...

"What have you found to be the biggest priority as you are heading into the second half of the year?"

...

"Bill, have a great day. Looking forward to speaking again soon."

Shared Truth/ Client Voice

- To open your call, leverage your 3x3 research and HON to construct a Shared Truth
- A Shared Truth is a statement that makes you sound credible and is something that your contact can relate to
- Example Shared Truths:
    - I've been speaking to a lot of small business owners who are struggling to keep up with their growth while using outdated and disparate business systems. How are you handling these issues internally?
    - Having spoken with many executives in your industry, many of them do not have immediate visibility into their business. It can take days to compile key metrics which has put them in a more reactive mode. Are you finding similar challenges in your business?
    - A lot of execs like you are dealing with the lack of communication between financial reporting and inventory management; in your experience is this an issue for your company?
- When possible, use client voice as another method for building credibility over the phone
    - Leads want to hear what to hear what our customers think more than what we say about NetSuite
    - Examples of client voice:
        - I was listening to your Q1 Earnings Call yesterday, when CFO ____ discussed his plans for your emerging market expansions. NetSuite has helped customers like Shaw Carpet and Williams and Sonoma go through these types of expansions and increase their efficiencies by leveraging our platform. How are you planning to handle this expansion?
        - We have worked with numerous fast-growing companies such as Groupon, GoPro, Warby Parker, etc. that were using either homegrown systems or siloed software systems that fragmented their customers' experience and hindered their omni-channel commerce strategy. How are you currently managing your customer's experience?

"Well it seems like we can definitely find some relevance in what our clients are doing. Now I said I'd make this quick, and the purpose for my call is to find time for us to talk when I'm not catching you off guard. How does Thursday look to pick up the conversation?"

...

"I'll send a calendar invite to confirm. Just so we make the best use of your time, do you mind if I ask you two more quick questions?"

...

"Is there any one else you'd like to include in the meeting?"

...

"What have you found to be the biggest priority as you are heading into the second half of the year?"

...

"Bill, have a great day. Looking forward to speaking again soon."

Pricing

Can I pay monthly?
The payment terms discussion is part of contract negotiation, but we do require upfront payment for annual subscriptions. NetSuite does work with many leasing partners who may be able to handle your request for monthly payments.

What if I only have a few employees, who barely need to login… can I get them a more limited user license?
Each user license within NetSuite would be considered either a full access user, or an employee center user. Employee center users can access calendar events, tasks, payroll, benefits, and HR-related tabs. Full Access users are able to access as much of the NetSuite application as their NetSuite administrator gives them permission to access.

How much does NetSuite cost?
1. If you have the info to promote the lead:
"What you shared today sounds very similar to what some of our customers were doing before purchasing NetSuite. I will find the right person who can answer more of your questions, including anything regarding price."
NOTE: Do not share any information on pricing at this point…no exceptions. Just defer to the sales rep.

2. If you haven't finished through your pre-qualification questions yet:
"Before we move forward, I'd like to explain my role here at NetSuite. I am a business development representative, essentially acting as liaison between you and the sales team. My goal is to learn more about your business requirements to determine if NetSuite can meet your needs and then get you in touch with the right resources here."
Suggested follow up questions:

- "Can you tell me a bit about why you're calling today?"
- "What is your role in the evaluation?"
- "What other solutions are you considering for this project?"

"NetSuite is a broad application and price is dependent on many factors including number of users and your specific needs in a solution. We need to better understand your requirements before providing an estimate."

Suggested follow up questions:

- “Can you tell me a little bit about your environment right now?”
- “Have you looked at any other solutions?”
- “Can you help me understand your timeline for this project?”
- “I’d be happy to pass on any budget constraints. What is your budget for this project?”

“While I can’t personally provide you an estimate for your company, what I can tell you is NetSuite starts in the tens of thousands and scales up from there depending on your needs. Does that fit within your budget expectations?”

3. Bonus question: “Well does that mean it costs $10k or $99k”

"I can’t really say in my position, it depends on many factors. I’d be happy to pass any budget constraints you have onto the sales rep.”
